

Additional Company's Objectives

To consider and approve the amendment to Clause 3 of the Company's Memorandum of Association, with details as follows:

Present	Proposed
The Company's objectives are 100 items.	The Company's objectives are 110 items.

- Clause 101 To engage in the business of trading, developing, designing, manufacturing, distributing, installing, improving, managing, leasing, servicing, repairing, and maintaining anti-unmanned aerial vehicle (Anti-drone) for commercial, military, and security, including spare parts, accessories, and software of such products.
- Clause 102 To engage in the business of trading, developing, designing, manufacturing, distributing, installing, improving, managing, leasing, servicing, repairing, and maintaining radio frequency jamming equipment for bomb detonation (Bomb Jammer), including spare parts, accessories, and software of such products.
- Clause 103 To engage in the business of trading, developing, designing, manufacturing, distributing, installing, improving, managing, leasing, servicing, repairing, and maintaining military surveillance equipment, including devices capable of day and night vision, and equipment capable of detecting temperature or thermal radiation (Thermal Camera), including spare parts and accessories of such products.
- Clause 104 To engage in the business of trading, developing, designing, manufacturing, distributing, installing, improving, managing, leasing, servicing, repairing, and maintaining the unmanned aerial vehicle system (Drone) unmanned aerial vehicles for commercial, survey, agriculture, military, and security purposes, including spare parts, accessories, and software of such products.
- Clause 105 To engage in the business of trading, developing, designing, manufacturing, distributing, installing, improving, managing, leasing, servicing, repairing, and maintaining robotic system, digital automatic system, virtual reality system (Digital Twin) for use in factory, warehouse, survey maintenance, service, and military field, including relevant software and devices.
- Clause 106 To engage in the business of trading, developing, designing, manufacturing, distributing, installing, improving, managing, leasing, servicing, repairing and maintaining information technology system, analytics system, artificial intelligence, CCTV image and video processing system, including surveillance, safety, marketing system and decision support system by connecting with and processing via network and Cloud system, both in domestically and internationally.
- Clause 107 To engage in the business of trading, developing, designing, manufacturing, distributing, installing, improving, managing, leasing, servicing, repairing, and maintaining telemedicine system and equipment, connected medical devices, including relevant software and platform.

- Clause 108 To engage in the business of trading, developing, designing, manufacturing, distributing, installing, improving, managing, leasing, servicing, repairing and maintaining medical kiosk, medical eligibility verification system, queue system, electronic medical record system, telemedicine system, medical device connectivity system and vital signal monitor connectivity system, including health data storage and transmission system via cloud system or public sector and private sector network
- Clause 109 To engage in the business of trading, developing, designing, manufacturing, distributing, installing, improving, managing, leasing, servicing, repairing, and maintaining Low Earth Orbit (LEO) satellite communication systems and end device, including telecommunication service via Low Earth Orbit (LEO) and all types of telecommunication equipment.
- Clause 110 To engage in the business of trading, developing, designing, manufacturing, distributing, installing, improving, managing, leasing, servicing, repairing and maintaining water treatment system, water supply system, water loss management system, water pressure and flow monitoring and control system (DMA: District Metered Area), control and monitoring system via automatic or digital system, including wastewater treatment system, water treatment system for consumption, together with engineering, machinery, electricity, structure and all kind of related works
